Strawberry Plants

SHIPMENTS—We pack all of our plants in slatted crates and dripping moss and guarantee safe arrival on all shipments up to April 10th. After that date they travel at risk of purchaser. We do not advise shipment of strawberry plants by freight but advise shipping by mail or express.

TERMS—We ask cash before shipment is made, or will take one-half cash and balance C. O. D. If you send check please add exchange fee. We prefer money orders.

MAIL ORDERS—On our mail orders we send just the same plants as if they went by express, and we sell as few as twenty-five plants to one person. But we hope you will make your order for \$1.00 or more. Remember we guarantee safe arrival.

PROMPT SHIPMENT—When you are ready to set your plants you usually want them at once and we can get them to you promptly. When you place your order with us, if the weather permits digging the plants they will go out to you promptly. We are one of the largest growers of strawberry plants in the Southwest and have been established since 1880. Every patron must be a pleased patron.

Price List of Strawberry Plants

We have some of the finest plants that have been grown in this section of the country in years.

Youngberry

The berries average about an inch in length; are purple in color; have a fine flavor and are very productive. The flavor is somewhat like a raspberry instead of a dewberry. The vines

are vigorous and sometimes grow twenty feet in one season. Although the vines are thorny, the fruit stems hang out from the vines making them easy to pick. We set 1,000 plants to the acre, making the rows about 9 feet apart and setting them about five to six feet in the row. Should be set as early in the spring as possible although some set in the fall. As vines start to run, keep them trained along the rows so they will not be in the way of the plow. In winter place posts along the rows every ten feet and string two wires on to them, the first wire being about eighteen inches from the ground. In the early spring tie your vines up to the wires, stretching the vines out full length. One set of posts and wires will last the lifetime of the plants or ten or fifteen years. After fruiting, cut out all old wood and train and cultivate the vines as you did at the first. Plow and hoe when needed.

PRICES:—Post Paid: 1 doz., 75c; 25, \$1.40; 50, \$2.25; 100, \$3.75. Express Collect: 250, \$5.00; 500, \$8.00; 1,000, \$15.00; 5,000, \$70.00.

Grohoma

This is a new kaffir corn and we find it a wonderful grower on our farm; we truly think it will make 100 bushels of threshed grain to the acre on good soil. Should be planted in May but will do well planted as late as July 4th. Will do well in dry weather and is fine for stock and chickens. Three pounds will drill an acre. You should try some of this fine feed.

PRICE OF SEED: 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$3.00; 25 lbs., \$8.00; 50 lbs., \$14.00. In lots of one to five pounds we pay postage; larger lots, express collect. Don't fail to plant an acre; 3 pounds will drill an acre.

Blackberry Plants

VARIETIES: Blower, Dallas, Erie, Early Harvest, McDonald, Rathburn, Robinson, Snyder and Ward.
